

FULL STACK DEVELOPMENT

DAY:2/TUESDAY

DATE:19.05.2026

TODAY TOPIC:

- INTRODUCTION OF JAVA
- PROGRAMMING LANGUAGE
- TYPES OF LANGUAGE
- WHAT IS JAVA
- WHY WE LEARN JAVA

INTRODUCTION:

Java was invented by James Gosling in 1995 at Sun Microsystems. The original name of Java was Oak, but that name was already in use, so it was later changed to Java. Java is an open-source programming language

PROGRAMMING LANGUAGE:

3 TYPES OF PROGRAMMING LANGUAGE

- Low Leval Language
- Medium Leval Language
- High Leval Language

LOW LEVAL LANGUAGE:

Low-level language is a command-based language that is close to machine language.

MEDIUM LEVAL LANGUAGE:

Medium-level language is a combination of low-level language and high-level language.

C,C++

HIGH LEVAL LANGUAGE:

High Leval Language used in Java And Python And Human Understand language

HISTRY OF JAVA:

- Start year 1991
- Completed/Developed year 1995
- Java include JDK,JRE and JVM.

Java was created by James Gosling and his team at Sun Microsystems

WHY WE LEAN JAVA

We learn Java because it is easy to use, secure, reusable, and widely used for developing mobile applications, web applications, and software programs.
